

Organic Fertilization & Pest/Disease Control

Disabatino uses only the finest products on your landscaping. To that end, we've created the ultimate blend of Organic Fertilizer, *Jaxon's Blend*, that can provide the valuable nutrients your plants need while keeping your family and the environment safe from poisons and harsh chemicals. *Jaxon's Blend* was created by our arborist and was inspired after his new son, in hopes of keeping him safe from toxins and poisons that can affect his newly developing body.

Why Fertilize?

- Many landscape plants are not native to the areas they are planted, making it hard to adapt
- Newly installed landscape plants do not have the established root systems needed for taking in nutrients and water
- Helps maintain necessary nutrients and moisture that can be drained during hot, dry growing seasons

What We Use:

- This blend is composed of materials including sea based kelp and sea water extract. The ocean is the richest nutrient laden place on earth and over 90% of the organisms on earth thrive in the oceans.
- Symbiotic organisms, including mycorrhizae and bacteria that are found throughout nature and strongly promote healthy root systems

Plant Health Care Special For HOA/Civic Assoc.

If the HOA/Civic Assoc. signs up for a yearlong Plant Health Care Program (which includes an Organic Fertilization to all communal trees and shrubs as well as 4 inspection/treatment visits to help maintain the health of all communal trees and shrubs) they will receive \$100 off. If this is something you're interested in, please contact the office at 302-764-0408 to have our Plant Health Care Specialist out to view the property.

ALSO, If 5 or more home owners within the HOA/Civic Assoc. sign up for PHC, the HOA/Civic Assoc. will receive another \$50 off of their program and each home owner would receive 10% off of their first year of applications.
